EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Ronald Grudziecki on February 19, 2004.

The application has been amended as follows:

Claim 3, lines 3 and 4, ",preferably less than 30% and in particular less than 10%" has been deleted.

Claim 10, line 2, "bardening" has been changed to ---hardening---.

Also two new claims are incorporated into application:

16. (new) Semi-finished and finished products according to claim 1, wherein they are at least partly hardened in a surface layer, wherein the thickness of the precipitation hardened layer is less than 30% of the material thickness measured perpendicular to the surface.

17. (new)) Semi-finished and finished products according to claim 1, wherein they are at least partly hardened in a surface layer, wherein the thickness of the precipitation hardened layer is less than 10% of the material thickness measured perpendicular to the surface.

Art Unit: 1742

The following is an examiner's statement of reasons for allowance: The art of record does not teach or fairly suggest the semi-finished and finished products in the form of sheets, profiles or shafts made of corrosion-resistant, precipitation hardenable, austenitic special steel alloy composition, as claimed, with a high interstitially dissolved nitrogen content, with substantially smooth surfaces, wherein the steel material is precipitation hardened in a zoned manner; and the method of making said steel by working, heating and precipitation hardening inductively or by laser irradiation. Note that prior art does not teach precipitation hardening in a zone area but rather in a furnace for the entire volume of material. Also DE 19815670 teaches inductively hardening but only in the threaded area of a screw and not in a substantially smooth surface. The present invention is unique in that it provides a semi-finished and finished products having strength and corrosion resistance in optimized areas by using an inexpensive manufacturing method.

Information Disclosure Statement

The information disclosure statement filed June 26, 2002 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. It has been placed in the application file, but the information referred to therein has not been considered.

Art Unit: 1742

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Deborah Yee whose telephone number is 571-272-1253. The examiner can normally be reached on Monday-Friday from 6:00 to 2:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Roy King can be reached on 571-272-1244.
